Checklists of Information by Department Users for handling suport mails and tickets

Introduction

GePNIC Technical Support team regularly received planty of mails every day. Some of the mails have insufficient information. Most users also are not clear what the problem is and what information needs to be conveyed. In some of these cases it taked nearly 8 mails to get all the requisite infomation from the user.

This is an effort to get necessary informtion from the user in one go. There are checklists available for different problem statement. If the support teams get the necessary details from the user using these checklists, it will make their work easier and it would be enlightening to the user to know the information needed to resolve the prolem they face.

Instructions

This Checklist is for all Support Teams of GePNIC / eTender setups across India.

The support teams in each setup be it Technical Support or CPPP or Helpdesk or State Support teams or Support Teams of a State Coordinator need to follow these checklists for
a) Getting Relevant Details from the User.
b) Checking and finding out the actual problem and cause of the same.
c) Ascertaining method(s) of resolution for the issue reported.
d) Easy resolution of reported issues.

The support teams should also verify for these details and documents.
